

The Best Value in 4" - 5" Air Filters

Air Demon® Ultra High Efficiency 4" - 5" Air Filters

Since 1922, Better Air is Our Business®

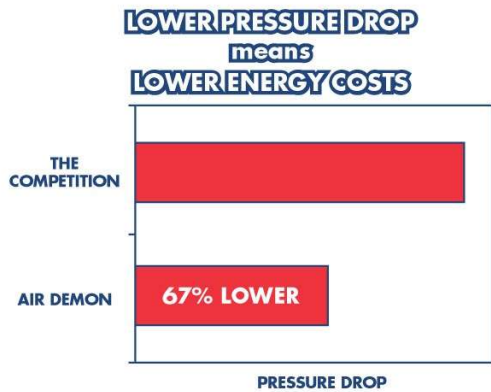

Our highly efficient electrostatic media traps even the smallest particles with the lowest pressure drop. Offer your customers the best value — cleaner air, lower energy cost — Air Demon.

- Captures microscopic airborne particles such as dust, pollen, mold spores, pet dander, bacteria, and the particles that carry viruses.
- 33% more airflow than any other 4" - 5" filter means lower energy costs and cleaner air.

Cleaner Air Lower Energy Costs

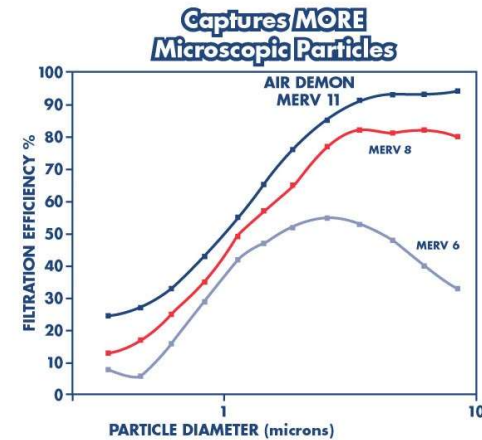

Your customers are looking for the best value in cleaner air. Air Demon is the answer. Air Demon provides a combination of trapping and removing the smallest and potentially harmful particles in the air, while allowing the maximum amount of air to flow through the filter. One of the most efficient 4" - 5" filters also lowers energy costs. That's value.

Based on actual pressure drop results of ASHRAE 52.2 testing. ASHRAE is the American Society of Heating, Refrigeration, and Air Conditioning Engineers. The ASHRAE 42.2 Test Standard is the industry accepted methodology for measuring filter efficiency and pressure drop.

Always sell filters with MERV ratings. MERV is accurate and comparable. MERV (Minimum Efficiency Reporting Value) is an industry testing standard developed by the American Society of Heating, Refrigerating and Air-Conditioning Engineers. The test reports the filter's ability to trap particles of various sizes from the air we breathe.

The particles tested range in size from 0.3 to 10.0 microns in diameter. The higher the MERV rating the more efficient the filter performs at capturing smaller particles.

Air Demon® Ultra High Efficiency 4"- 5" Replacement Air Filters
